ABOUT

I have a solid background in both front-end and back-end technologies, specializing in creating dynamic web applications.

My skills include React, Vite, and Node.js, with a focus on the MERN stack (MongoDB/MySQL, React, Node.js, Express.js).

I am eager to apply my knowledge in a practical setting, learn quickly, and collaborate on innovative projects. I would be excited to contribute to and grow within your organization.

WORK EXPERIENCE

Google Student Developer Club

Full Stack Web Developer

August 2024 - Present

- Developed a leaderboard for the Google Developer Student Club (GDSC) to provide real-time scores during Hacktoberfest 2024, making it both engaging and informative. Tech stack includes React.js, Chakra UI, MongoDB, and AWS.
- Frontend:
 - React.js: Utilized for a modern, responsive, and interactive user interface.
 - Chakra UI: Employed for styled components, ensuring a professional design.
- Backend:
 - Node.js with Express: Used to manage API routes and leaderboard functionality.
 - MongoDB: Serves as the database for user information, progress tracking, and contribution records.
 - Socket.io: Facilitates real-time updates for the leaderboard.
- Deployment:
 - EC2 Instance: For deploying the server back-end.
- Deployed Wesbite: gdsc-rait.vercel.app

CSI MERN Winter Internship Program
